Using traditional cognitive behavioral therapy (CBT), the program is designed to help you identify skills, strengths and resources already at work in your life, that you can use to help you get on the road to feeling better. Therapy sessions are conducted with a professional counselor over the phone or in person.

*Note: Your Aetna International benefits may cover a certain number of sessions per issue, per year with a professional counselor, as determined by your plan. Face-to-face counseling available depending on provider.
